

BROADCAST ENGINEER (STUDIO)

Overview

MeyerPro Inc. is a premier provider of audio-visual services and broadcast solutions, specializing in corporate, entertainment, and live event sectors. Since its founding in 1984, the company has consistently delivered industry-leading creativity, expertise, and technology to the Pacific Northwest. Over the years, MeyerPro has experienced significant growth, expanding its reach to serve clients across multiple states and internationally.

The Broadcast Engineer position is a multi-faceted, full-time position located in the greater Seattle, WA area. The employee will be responsible for maintaining and updating the equipment installed in a multicamera XR/AR studio, maintaining technical documentation, and integrating additional broadcast or audio-visual equipment needed on a show-by-show basis. The position requires a professional understanding of broadcast cameras and video switchers, a deep understanding of video and audio signal routing, and a comprehensive understanding of networking. The employee will maintain the studio/facility according to the standards set forth by the Company. It is the policy of MeyerPro Inc. to provide excellent customer service both internally and externally. Employees are expected to perform all of their duties and responsibilities in accordance with this policy at all times.

Responsibilities

- Ability to troubleshoot audio, video, and control system problems (e.g., Ross, EVS, Sony, Disguise)
- Professionally interact with clients and manage expectations
- Communicate with account managers to ensure all technical requirements, equipment and labor related to production are correct
- Participate in meetings and phone calls with internal and external staff and clients regarding upcoming events
- Work with internal and external staff and communicate needs and procedures respectfully
- Maintain, configure, and repair equipment as needed, or facilitate the RMA process
- Ability to work independently and manage priorities effectively
- Inspect, test, and maintain equipment to ensure reliable operation
- Participate in the loading and unloading of equipment from delivery vehicles
- Participate in setup, operation, and breakdown of equipment for events

Qualifications

- Minimum of 5 years of experience as a Broadcast Engineer or EIC
- High school diploma or its equivalent
- Relevant trade school, technical school, or post-high-school training may be considered in combination with professional experience
- Strong customer service skills with the ability to self-manage
- Excellent understanding of equipment within the department as well as strong networking skills
- Proven ability to quickly identify and troubleshoot problems
- Excellent oral and written communication skills
- Ability to maintain a high degree of professionalism in pressure situations
- Excellent working knowledge of common computer productivity tools, such as Microsoft Office
- Must maintain a professional appearance
- Valid driver's license
- Ability to lift and carry up to 50 lbs. and perform the physical duties of the position, with or without reasonable accommodation

Benefits

- Premium medical insurance
- Premium dental insurance
- Annual vacation pay
- Sick pay
- Seven paid holidays per year
- One paid floating holiday per year
- Monthly cell phone stipend
- 401(k) eligibility after six months of service
